### 一.目标

针对各行业不同特点,梳理出该行业各利益相关方普遍关注的重点议题,并推动行业企业完善 ESG 信息披露,充分回应议题。

### 二.策略

为了凝聚共识, 上海青悦从专业独立第三方的角度, 认为应该以对环境社会等公共利益及可持续发展角度为主, 同时兼顾企业自身可持续发展, 来确定实质性议题的优先级。同时也要认识到, 由于作用力与反作用力的逻辑关系, 公共利益的可持续发展与企业自身可持续发展之间存在非常强的相关性。

基于以上原则,上海青悦对 22 个 ESG 议题在钢铁行业的优先级从公共利益可持续发展及利益相关方重要性和企业自身可持续发展重要性两个维度进行了划分。

我们认为:钢铁行业企业,应该重点关注影响力高度议题(矩阵绿色区域)和中度议题(矩阵蓝色区域),适当关注低度议题(矩阵灰色区域)。

## 三. 钢铁行业实质性议题影响分析

a) 钢铁行业实质性议题影响矩阵

低	员工权益与发展 公平竞争&反垄断

# Steel industry ESG substantive issues priority disclosure recommendations

Release: 2021-05-26 First Edition

#### concentrate:

- 1. This article introduces Qing Yue's observation and reflection on the substantive issues of the steel industry, which are still being continuously improved, and welcomes the views of all parties.
- 2. The English version of this article is automatically translated into Microsoft word documents, and errors are not ruled out, whichever is Chinese.

#### — . target

In view of the different characteristics of each industry, sort out the key issues of general concern to all stakeholders in the industry, and promote industry enterprises to improve ESG information disclosure and fully respond to the issues.

### 二 . tactics

In order to build consensus, Shanghai Qingyue from the perspective of professional independence third party, think that should be based on the environmental and social public interests and sustainable development, while taking into account the sustainable development of enterprises themselves, to determine the priority of substantive issues. At the same time, we should also realize that because of the logical relationship between force and reaction force, there is a strong correlation between the sustainable development of public interest and the sustainable development of enterprises themselves.

Based on the above principles, Shanghai Qingyue divided the priorities of 22 ESG issues in the steel industry into two dimensions: the importance of the public interest and the importance of stakeholders and the importance of sustainable development of the enterprise itself.

We believe that: Steel industry enterprises should focus on high impact issues (matrix green area) and moderate issues (matrix blue area), and appropriate attention to low topics (matrix gray area).

### $\equiv$ . Analysis of the impact of substantive issues in the steel industry
